Director (Projects), Office of Development and FM
Nanyang Technological University, Singapore

Ir Alex Kwan
Executive Director
Hong Kong Airport Authority

Ir Prof Sam Chan
Associate Director
CICID, The University of Hong Kong

Ir Prof CK Mak
Vice Chairman
CICID, The University of Hong Kong

Productivity measures the output to input ratio and provides valuable insights into the long-term potential of an economy. The construction industry makes a significant contribution to securing a sustainable future of Hong Kong. Therefore, construction industry productivity has long been an important issue for Hong Kong, which nevertheless is faced with severe challenges such as cost escalation and labour shortage. This international consultation forum is part of a study funded by the Construction Industry Council (CIC) and led by The University of Hong Kong (HKU), which aims to enhance the productivity and efficiency of the Hong Kong construction industry by conducting a comprehensive and rigorous investigation on the practices, procedures and standards adopted in the industry. The forum aims to explore strategies and measures, both locally and internationally, for improving construction industry productivity in five strategic areas, namely, (1) policy formulation; (2) regulatory requirements; (3) planning and design; (4) project management and administration; and (5) site construction. The forum will feature renowned international and local speakers to share the state-of-the-art knowledge and practice of enhancing construction productivity at industry, project and activity levels.

Attending this seminar is FREE of charge, but advanced registration is required on the first-come first-served basis.

For enqury on this event, please contact Ms Ruby Kwok (ppos@hku.hk, +852 2219 4986), Dr Wei Pan (wpang@hku.hk, +852 2859 2671) or Dr Arshad Ali Javed (aajaved@hku.hk, +852 3917 8260) of Department of Civil Engineering, The University of Hong Kong.
