

Recruitment of New Members

On the 9th September 2016, a Member Recruitment Session of Project Mingde was held successfully to recruit a new generation of student members in order to ensure the continuity of Project Mingde. There were more than 60 participants and they are from different faculties, including Engineering, Law, Architecture, and Social Sciences. The response is overwhelming and there are 103 current and new members registered to participate in the forth-coming projects of Project Mingde within a week after the sharing session! It was a meaningful evening and we all look forward to working with the passionate and enthusiastic new members!
