

The Fourth Working Trip to Guigang

(10th –11th January, 2018)

By TSOI Yu Tung – BEng(CivE) II

The fourth working trip to Guigang was led by Dr. Ryan C.P. WONG together with 7 students from The University of Hong Kong. The objectives of this trip are to discuss the school maintenance contract with Boss Wu and to carry out a rough land surveying of the new toilet.

On the first day, Dr. Wong introduced the methodology of the maintenance work to the students. Students had a chance to go inside some of the classrooms to observe the concrete cracks.

Besides, students also carried out a simple land surveying of the new toilet. The construction work of Duling Primary School Extension Project is going to commence in this summer. There is a toilet inside the proposed working site and demolition is needed before starting the Extension Project. The toilet need to be relocated, and the Principal of Duling Primary School proposed two new locations of the toilet. Therefore, surveying is required for the toilet design. Tape was used for measuring the two proposed locations, and all the data collected is used for the new toilet design.

Next day, the drafted contract was discussed with Boss Wu. This drafted contract was prepared by the students before the trip and Boss Wu suggested some minor amendments. When the new version of the contract is done, it will be sent to him to sign. After the work, Principal of Duling Primary School invited all of us to his home for lunch. We had a chance to taste the delicious local food.

After this trip, students learnt the basic concept of contract drafting and gained the experience of land surveying.

List of team member for the trip

Teaching staff:

Dr. Ryan C.P. WONG

7 undergraduate students:

CHAN Chun Hin	– Bsc(surv)	I
CHAN Chun Yiu	– BEng(CivE)	III
CHAN Wai Hang	– BEng(CivE)	III
CHAN Wing Pang	– BEng	I
LEUNG King Tim Timothy	– BEng(CivE)	II
TSOI Yu Tung	– BEng(CivE)	II
WONG Chun Hei	– BEng(CivE)	II
