

Reflection on the trip to Guangxi (12th – 15th January 2016)

Ka Chun LIU

Miao is a lovely ethnic group. They feel satisfactory in having simple life and staying with people in love. During the four-day trip, we have been get touch with Miao adults and students. Apart from learning their culture and experiencing their living, the main objective is to help a local primary school to plan the layout and renew the school to meet future needs in the aim to be a center school throughout the area. Throughout the trip, we obtained some useful information for future analysis and planning. It is hoped that we can provide a better plan for local students to grow and become a future social pillar of the society. Although the aerial photography cannot be used in the time, hopefully there will be another application chance in the coming future. This trip is a good start of cooperation between civil engineering students and other students including surveying. They can make use of their knowledge to create a better result.
