

Reflection on the trip to Guangxi (12th – 15th January 2016)

June Hong Ting LAI

This trip is a very valuable experience for me. I understood the situation of the local primary school there through the visit. I understood their needs, such as better hygiene condition, more dormitory, more classrooms and more toilets. Although the students there are really in need for better learning environment, most of them are still satisfied with the condition, this gives me a strong feeling of accomplishing the mission of improving their learning environment and give them a brighter future. Looking back to my studying environment, I am so lucky to have very nice environment and a lot of learning opportunities, these are very precious. Although recently the direction of this project has changed dramatically, I hope I can still put my biggest effort to be involved in this project, and help designing the new school layout that best suit them. I am sure this project will teach me a lot of technical things and provide me precious experience.
