

Reflection on Study trip to University of South China University of Technology

(Jun 19-22, 2018)

CHAN Chun Kay BEng(CivE) III

In this SCUT four days exchange, I had a chance to communicate with Civil Engineering student in mainland China and learnt using their engineering software. SCUT is a university which is much larger than HKU. During the exchange, we were led by local university students and visited numerous laboratory in SCUT. The size of laboratories was much larger than the laboratories in HKU. I was amazed by the scale of the laboratory in SCUT, especially the Wind Tunnel Laboratory. We also had a site visit to Humen 2nd Bridge and the site was clean and organised.

This exchange also gave me a chance to live in Mainland for four days and I had a thorough understanding on how popular mobile payment was in China.
