Abstract

The mainly visual presentation, briefly introduces Chinachem today, what Chinachem are doing in starting out to become more environmentally responsible, a brief explanation on Corporate Social Responsibility and sick building syndrome, some simple examples of what can be done to be more sustainable, and poses some questions which it is hoped can be answered by other speakers in the conference.

Speaker

Mr. Tony Wilson came to Hong Kong in 1981 and worked with the Architectural Services Department of the Hong Kong Special Administrative Region Government. He worked on all types of projects small to large, hospitals to crematoriums, including those in between. He was in directorate managerial roles including introducing environmental approaches into Government projects.

In 2006 he joined AECOM and worked on the Ocean Park Project building new homes for our dolphins and pandas. In 2010, he joined Chinachem as Director of Architectural Services and is assisting with moving towards more sustainable designs for the future.
