

I would like to express my sincere gratitude to the Project Mingde 10th Anniversary Trip Taskforce for their excellent efforts and contributions in organizing this meaningful and successful event! It is our honor to have our President and his wife, Professor and Dr. Mathieson, with us on this trip. It was indeed an exhausting trip, but I am sure all participants would agree that it was all worthwhile when we saw the smiling faces of children and villagers. I do hope that our Friends of Project Mingde would come back more often to share with our students their knowledge and experience, and their passion and love, for the benefits of students' professional and personal developments, as well as the underprivileged in the remote areas in Mainland and elsewhere.
