

Reflection on the trip to Guangxi (5th – 8th March 2016)

CHAN Lok Tin

This is my fourth time to join trips by Project Mingde. Unlike the previous three trips, this trip gave me a quite special experience. The most unforgettable thing in this journey is staying in the car for a very long period. In my life, it would be the longest time for me to travel all day. However, I still learnt a lot in this trip.

On the second day of the trip, we met students in Guangxi and the contractors from Shanghai and we discussed on the updated design of the building. It was my first time to work together with other stakeholders and it was a invaluable experience for me in the future. On the third day of the trip, we presented our preliminary design of the construction project in Fengmu. Advice on the design was given to us and I learnt how to produce a better design to a project.

Last but not least, Project Mingde always gives me a trip that makes me comfortable and happy. I hope I can join more trips which is being held in the future.
