

This is my second time to join Project Mingde's trip. We went to a Duling Primary School in Guaigan, GuangXi. Our objectives is to negotiate the contract with local contractor and carry out some simply land surveying.

Before the trip I got an opportunity to draft the contract, this is a great learning opportunity for me to learn the format of China contract. It is quite different to the contract in Hong Kong. I believe this could not be learnt in class.

Besides, I have done some simply land survey by using tap with other members. This was a challenging job, any mistake would lead to wrong design of the toilet and the progress of the projected is slowed down. We must do the measurement carefully and make sure the recorded readings are correct. I have learnt in class that tap will "sag" for long distance measurement, this trip is my first time to see the real "sag" of tap. In order to reduce the error, some members need to support the tap at the middle of the tap.

This working trip is really wonderful to practice what I've learnt in lecture.
